- Angular
- .NET
- Bootstrap
- Tailwind CSS
- NEXT.JS
- Unity

PRODUCTIVITY

- Azure DevOps
- Git
- Figma
- Jira
- Blender
- Azure
- Draw.io

PROJECTS

DESIRED RESULTS DEVELOPMENT PROFILE

- DRDP Online is California's platform for teachers and administrators to complete DRDP assessments securely online, aiding in quality improvement efforts statewide. My contributions include API development, Angular frontend design, and site-wide internationalization.

BEYONDSST

- BeyondSST provides solutions for school challenges in Student Success Team meetings, including disparities, procedure inconsistencies, and intervention planning. I contributed to API development and frontend design using the Angular framework.

FOCUS

- Focus on Children Under Stress enables first responders to quickly connect with schools and administrators when a child experiences trauma. I contributed to this project by developing the API using .NET Core and implementing client-side features using Angular. I also created queries and stored procedures using SQL Server.

EXPERIENCE

ATTENDLY

UI/UX Designer & Web Development

April 2026 - August 2026

- Redesigned parent and admin workflows across multiple web applications.
- Created responsive prototypes and improved layouts based on team and user feedback.
- Supported website redesign planning, conference materials, booth concepts, and branded swag.

TK8 SPORTS

Web Designer & Developer

April 2025 - April 2026

- Designed, developed, and updated pages for the TK8 Sports website.
- Improved page layouts, responsiveness, and overall usability.
- Implemented website changes based on team feedback and project needs.

CODESTACK - SAN JOAQUIN COUNTY OFFICE OF EDUCATION

Junior Web Developer

November 2023 - January 2025

- Developed API integrations, SQL stored procedures, and client-side features using .NET Core, Angular, and TypeScript.
- Supported localization for the DRDP website and contributed to sprint planning, releases, and QA.
- Built features for the CodeStack Conference website and mentored students at CodeStack Academy.

EDUCATION

CODESTACK ACADEMY

12 Months of intensive and extensive project based curriculum and learning

2022-2023

- Developed Serenity during coursework and completed several projects showcased on GitHub. Built the frontend using React, TypeScript, HTML, CSS with backend API in C#. Figma and Bootstrap were used to style and design the UI.
